Help your clients save with Select PPO

To help your clients receive a range of premium savings, we've combined our Select PPO network and Select PPO plans to offer a large provider network and plan designs that translate to greater savings and expanded access.

That means a statewide average savings of about 4%[1] compared to a traditional Prudent Buyer preferred provider organization (PPO) network, based on location, network, and plan designs.

Creating cost efficiency

To provide even more network savings, the Select PPO network includes doctors who practice with the greatest cost efficiency in all areas of care, including professional, institutional, diagnostic testing, inpatient and outpatient care, and prescription drug costs. By identifying these doctors, we can offer an exceptional network at a lower cost. The table shown to the right illustrates the level of network savings achieved by region.

Offering plan choices

Your clients have a selection of standard PPO and health savings account (HSA) plans they can pair with our Select PPO network. No matter which plan they choose from that selection, pairing it with the Select PPO network instead of the Prudent Buyer PPO network can save them up to 4%[1] in premiums for the same comprehensive benefits.
