Terms and definitions

Coinsurance — The percentage of costs you pay (20%, for example) after you've paid your deductible, on a covered health care service.

Copayment (copay) — A fixed amount you pay (\$15, for example) for a covered health care service after you've paid your deductible.

Deductible — The amount you pay for covered health care services before your insurance plan starts to pay. With a \$4,000 deductible, for example, you pay the first \$4,000 of covered services.

Health Maintenance Organization (HMO) — A type of health insurance plan that usually limits coverage to care from doctors who work for or contract with the HMO.

Health Savings Account (HSA) — A type of savings account that lets you set aside money on a pre-tax basis to pay for qualified medical expenses. An HSA can be used only if you have a high-deductible health plan.

High-Deductible Health Plan (HDHP) — A plan with a higher deductible than a traditional insurance plan. The monthly premium is lower, but you pay more health care costs yourself (your deductible) before the insurance company starts to pay its share. An HDHP can be combined with an HSA, allowing you to pay for certain medical expenses with money free from federal taxes.

Network — The facilities, providers and suppliers your health insurer or plan has contracted with to provide health care services.

Out-of-Pocket Maximum — The most you have to pay for covered services in a plan year. After you spend this amount on deductibles, copayments, and coinsurance, your health plan pays 100% of the costs of covered benefits.

Plan Medical Group (PMG) — A designated group of physicians and hospitals associated with your network.

Premium — The amount you pay for your health insurance every month. In addition to your premium, you usually have to pay other costs for your health care, including a deductible, copayments and coinsurance when you access care.
